

TIHOMIR GODEK

Web developer with background in architecture and guest relations. Born team player, seeks to secure position in a reputable organization to work, expand my knowledge, and skills.

SKILLS & TOOLS

HTML CSS JavaScript React Node.js

VS Code GitHub Bootstrap jQuery
npm Ora Figma MongoDB Expo Firebase

LIFE EXPERIENCE

Porter 2016 - current

Hotel Bayerischer Hof, München

- Providing exceptional guest service by maintaining the highest quality standards for appearance, cleanliness, and safety, to result in satisfied and returning guests

Entertainer 2012- 2015

Adriana Azura d.o.o., Island Pag

- Organized daytime and evening entertainment programme for a team of 15 entertainers
- Delivered a variety of game shows and activities for guests

AutoCAD drafter 2012- 2015

Projects with Dragan Godek CE, Zagreb

- Converted hand made drawings to Solid and Surface CAD models with AutoCAD
- Ensured product designs met required safety and structural standards by verifying details of every model

NON RELATED EDUCATION

CAD specialist 2014

Algebra, Zagreb

Faculty of Kinesiology 2010- 2012

Architecture Technician 2006- 2010

Architecture High School, Zagreb

PROJECTS AND EDUCATION

Full stack web development 2020- 2021

CareerFoundry, Munich

600 hour+ mentored program focussed on project based learning

- Server-side programming & Node.js
- Client-side programming with React
- Testing in the Development process
- Native App Development & React Native

Movietron

Web application that provides users with detailed information about movies, i.e. genres or directors.

- Developed server and user clients based on the server side code
- Created REST API for a web application "Movietron" that interacts with MongoDB
- Built a single page application (SPA) using REACT

Some of the feats I conquered...

- Load data from an external API
- jQuery
- Bootstrap to create a clean and usable design
- Ensure my apps work in all necessary browsers
- Node.js syntax
- Route HTTP requests for my project using Express
- Define the endpoints for my REST API
- Create a relational (SQL) database for storing movie data using PostgreSQL
- Recreate my relational (SQL) database as a non-relational (NoSQL) database using MongoDB
- Model my business logic using Mongoose
- Implement authentication and authorization into my API using basic HTTP authentication and JWT (token-based) authentication
- Incorporate data validation logic into my API
- Implement data security and storage controls
- Created React SPA
- built an app using the TDD technique
- Set up a development environment to work with React Native and Expo
- Build the chat screen and the chat functionality with the Gifted Chat library
- Authenticate users anonymously with Firebase
- store conversations in the Firestore Database
- Create an app using Angular CLI
